21 OCT 1988

Dr. Sigfried S. Hecker
Director
Los Alamos National Laboratory
of the University of California
Los Alamos, New Mexico 87545

Dear Dr. Hecker:

I appreciate your letter inviting me to tour the Los Alamos National Laboratory this December or January. However, since I wrote you last, my schedule has changed and I will not be able to come during that time. I am most interested in visiting your facility, and when I find I will be in the area I will have a member of my Public Affairs Office contact your office and discuss the date.

I was pleased to hear that your visit to our Headquarters Building in September was beneficial, and I wish our schedules would have coincided that day. Your invitation to ski in the Los Alamos area is a tempting one and I would certainly enjoy such an opportunity when it can be arranged.

Warmest regards.

Sincerely yours,

/s/ William H. Webster

September 22, 1988

The Honorable Judge William Webster
Director
Central Intelligence Agency
Washington, DC 20505

Dear Judge Webster,

Julian Nall arranged for me and five of my senior managers to visit CIA Headquarters yesterday. We were able to talk to and visit with people from three of your directorates. It was an extremely informative day and gave us a much better opportunity to see where our technology may be critical to the Agency's mission. I especially appreciated Julian's attention to arranging an informative visit.

In your letter of July 18, 1988, you indicated an interest to visit Los Alamos in December or January. We would be happy to host you. Please let me know when you decide on a specific date. During my visit, I learned that you are an avid skier. I want to point out that Los Alamos has a very respectable ski area about 15 minutes from the Laboratory. Also, the Taos Ski Valley is close enough (85 miles) for a day trip. January is typically more reliable for good snow conditions than December. I would be delighted to join you for a day if you are interested.

I hope to see you on October 6 during the Nuclear Intelligence Panel Meeting.

Sincerely,

A handwritten signature in dark ink, appearing to read "S. S. Hecker".

S. S. Hecker
Director

Dr. Sigfried S. Hecker
Director
Los Alamos National Laboratory
of the University of California
Los Alamos, New Mexico 87545

Dear Dr. Hecker:

Thank you for sending the copies of your testimony to the Congressional Committees. And thank you for your kind invitation to visit the Los Alamos Laboratory. I would be most interested in seeing the important work being done at Los Alamos, and would like to accept your invitation for a date in December or January. A member of my Public Affairs Staff will contact you concerning arrangements.

I appreciate your remarks about your close relationship with Dr. Julian Nall, and hope for your continuing exchange with him and others at the Agency, as we all find it of value.

Sincerely yours,

/s/ William H. Webster

June 15, 1988

The Honorable William H. Webster
Director of Central Intelligence
Washington, DC 20505

Dear Judge Webster:

Enclosed are copies of my testimony of March 3 to the Subcommittee on Procurement of Military Nuclear Systems of the House Armed Services Committee and later testimony of March 18 to the Subcommittee on Defense Industry and Technology of the Senate Armed Services Committee.

The statements review the current capability of the Department of Energy's weapons laboratories to enhance the technology base available to the nuclear weapons program and to the Department of Defense. I also presented information on relevant ongoing research to develop technologies for future applications.

At Los Alamos, the Laboratory's own technology base, the intelligence work in our International Technology Division and my participation in your Nuclear Intelligence Panel have allowed us to formulate an integrated approach to applying cutting edge technologies to intelligence problems, both nuclear and nonnuclear.

We also have maintained a very cordial and continuing dialogue on developments in science and technology with Dr. Julian Nall through interactive visits in both Washington and Los Alamos.

I would welcome the opportunity to host a visit by you to further familiarize you with the ongoing work at Los Alamos in defense-related programs, intelligence, verification, and basic research that enhances the posture of the nation's security programs.

Sincerely,

S. S. Hecker
Director
